CAREER SUMMARY

With years of experience as a developer, I'm driven by a continual love of learning and innovation. My career is marked by collaborative efforts to develop web-based applications and improve product quality through code optimisation and proactive problem-solving.

PROFESSIONAL EXPERIENCE

Freelance
Full-Stack Developer
12-2024 - Present

Frontend Development:
- Develop the Fantasy Tunisia mobile application using React Native for cross-platform compatibility (iOS and Android).
- Design and develop a high-performance, user-friendly mobile application using React Native.

Backend Development:
- Develop and maintain a scalable backend using GoLang.
- Implement RESTful APIs to handle user data, team management, and real-time updates.
- Ensure secure and efficient data handling with Supabase.

Integration:
- Integrate frontend and backend components effectively to deliver a cohesive product.
- Work with third-party APIs and libraries to enhance the application's functionality. Address and resolve application issues promptly.

Technologies used:

`GoLang` `React Native` `Supabase` `Expo Go` `React` `Material UI`

Backend Developer   Digital Natives
08-2024 - 11-2024

- Designed and developed RESTful APIs to handle requests and responses efficiently.
- Designed and maintained relational database schemas in MySQL.
- Used tools like APIDOG.com for documenting APIs.
- Performed unit tests on the server using Termius.

Kuda Website
Technologies used:

`NodeJS` `Express` `Sequelize` `JavaScript` `JWT`

Project Manager   Digital Natives
12-2023 - 08-2024

- Defining Project Scope: Work closely with founders and stakeholders to define project goals, deliverables, timelines, and success criteria.
- Sprint Planning: Lead sprint planning sessions, ensuring that the team has clear, actionable tasks and understands priorities.

EDUCATION

Full Stack Javascript Developer
RebootKamp (RBK)
08/2022 - 02/2023

Master degree in quality, safety and environment management
Leaders University - Tunisia
09/2014 - 10/2016

License in international economics and finance
Faculty of economics and management - Tunisia
09/2010 - 06/2013

Baccalaureate
High school 7 November - Tunisia
09/2009 - 06/2010

DEVELOPMENT STACK

Programming Languages
GoLang
Python
JavaScript
TypeScript

Frontend Libraries & Frameworks

- Iteration Reviews and Retrospectives: Conduct regular reviews and retrospectives to evaluate progress, gather feedback, and continuously improve processes.
- Team Collaboration: Facilitate collaboration between development, design, marketing, and sales to ensure that project goals are met cohesively.

Digital Natives Web Site
Full-Stack Developer   Digital Natives
02-2023 - 11-2023

- Develop the backend for a web application similar to Airbnb using Node.js, Express.js, and Sequelize. Implement APIs such as OpenAI and FastForex.
- Perform unit tests on the server using Termius.
- Document the project using APIDOG.com.
- Develop an admin dashboard with a Material UI template.

superhost.com.tn
Technologies used:

`NodeJS` `Express` `Sequelize` `JavaScript` `JWT` `React` `Material UI`

Freelance   08-2022 - 10-2023
Project 1: Sales Store Dashboard Full-Stack Developer

- Develop the backend for an Admin dashboard using Node.js, Express.js, and Sequelize.
- Develop an admin dashboard with a Material UI template.

Technologies used:

`NodeJS` `Express` `Sequelize` `JavaScript` `React` `Material UI`

Project 2: Tawelti Full-Stack Developer   RebootKamp (RBK)

- Integrate Cloudinary with React Native and Google Maps.
- Develop the backend for the mobile application using Node.js, Express.js, and Sequelize.
- Designed and developed an admin dashboard.
- Collaborate on data analysis and improve SQL queries of high volume databases.

Technologies used:

`React Native` `NodeJS` `Express` `Sequelize` `JavaScript` `JWT`

Full-Stack Developer   PROMOCUISINE (Cuisina + Marmotek)
06-2020 - 08-2022

- Displays key sales metrics such as total sales, number of deals closed, and top-performing products.
- Shows the top-performing sales representatives based on various criteria.
- A section to manage the list of products/services, including details like pricing and description.

Technologies used:

`JavaScript` `React`

React Native / React

Next.js

Backend Frameworks & Databases

Node JS

Express JS

MySQL, Sequelize

Supabase

MongoDB

Others

`Git` `Unlayer` `Termius`
`phpMyAdmin` `ApiDog` `Jira`
`Docker` `Redux`
